Science show held for Kindergarten Children in Doha, the State of Qatar

LNG Japan Corporation (President and CEO: Kyo Onojima; Headquarters: Chiyoda-ku, Tokyo; hereinafter referred to as the “LNG Japan”) hereby announces that it held a science show on 7th March 2024 for kindergarten children in Early Childhood Center of Qatar University and students in the Japan School of Doha.

As part of its commitment to forming communities that are compatible with Qatar’s remarkable growth, the government is planning a Social Development Program to create a well functioning society in a wide range of fields, including education, health and medicine, environmental and urban development, sports promotion, arts and culture.

Over a five-year period from 2012, LNG Japan has assisted in building a new facility of ECC located within the campus of Qatar University and has continuously carried out several events in the facility. (Past programs)

This science show in 2024 was held for the fourth time. As in the past, the event was held with the aim of increasing children's interest in science and technology.

In response to the favorable reception of the previous science show in 2023 and requests to hold it again, LNG Japan held the science show in 2024 with new contents.

The show was performed by Yonemura Denjiro Science Production, and Shadow Play Theatre KAKASHIZA.

The show received high praise from H.E. Satoshi Maeda Ambassador of Japan to the State of Qatar and distinguished guests from QatarEnergy LNG and others.

LNG Japan intends to continue such activities that can contribute to Qatar society.
